

事例 1

立面図

隣地斜線
 許容高さ: $20.000 \times 0.267 \times 1.25 = 20.333$ (m)
 屋根高さ: $6.100 - 0.433 \times 0.350 + 0.238 = 6.187$ (m)
 $20.333 > 6.187 \therefore OK$

隣地斜線
 許容高さ: $20.000 \times 0.077 \times 1.25 = 20.096$ (m)
 屋根高さ: $6.100 - 0.433 \times 0.350 + 0.238 = 6.187$ (m)
 $20.096 > 6.187 \therefore OK$
